Town of Fairhaven
Massachusetts
Office of the Town Administrator

TO: Fairhaven Board of Selectmen
FROM: Wendy L. Graves, Acting Town Administrator
DATE: March 8, 2021
RE: Recommended General Fund Capital Improvement Plan, FY22-26
CC: Finance Committee

Section 3- B-16 of the Town Administrator Act states, in part, the Town Administrator shall "submit annually to the Board of Selectmen a five year capital improvements program...to include: (a) a list of all capital improvements and supporting data proposed to be undertaken during the next five years; (b) cost estimates, methods of financing and recommended time schedule; and (c) the estimated annual cost of operating and maintaining any facility to be constructed or acquired." The following recommended Capital Improvement Plan substantially complies with those requirements with one major exception being the Public Facilities Improvement Plan which is a separate planning document and is in the process of being implemented.

The first step in developing a comprehensive Capital Improvement Plan (CIP) is for departments to submit their capital project requests. On pages 3-4 of this report you will find a summary spreadsheet of the general fund requests received from the departments. Additional information on each of these projects can be found on pages 17-102.

The second step is to prioritize these projects. To do this prioritization, the Capital Planning Committee were asked to analyze each project by applying the rating criteria found on pages 5-8. This rating system looks at such factors as overall fiscal impact, legal obligations, impact on service to the public, urgency of maintenance needs, prior phases being funded and department priority. The results of this prioritization is found on page 9.

The third step is to develop a multi-year financing plan that will fund these projects in the priority that they were placed. The time schedule for funding these projects is contained in the Town Administrator's Recommended CIP found on page 10 and the CIP financing plan is found on Pages 11-12. Recognizing that funding capital projects solely through Free Cash, (or "pay as you go") is not conducive to good capital planning given the uncertainty of free cash from one year to the next and that the Town has identified large projects in the $300,000 to $1.2 million range' that need to funded, this CIP continues the practice of using debt service (non-proposition 2 % excluded) as a financing tool. The goal is to, over time, build up debt service up to a consistent 3 to 4% of the operating budget. This would allow the town to issue new debt while paying off existing debt thus keeping constant the percentage of the operating budget allocated for debt service.

It is important to remember that a CIP is a planning tool that attempts to project into the future what our town's capital needs will be and to look at ways to fund those needs. This forecasting is particularly necessary when making decisions such as issuing debt that will have long-term implications. However, as a projection into the future, there will inevitably be changes as additional information and needs come to the forefront.

I would like to thank Town Accountant Anne Carreiro for her assistance in preparing this CIP and I would especially like to express my appreciation to the members of the Capital Planning Committee, Cathy Melanson, Vinnie Furtado, Dr. Robert Baldwin, Stephen Hickox and David Faunce for their work in prioritizing the projects.

Respectfully,

Wendy L. Graves
Acting Town Administrator

1 These large projects are separate and apart from the projects identified in the Public Facilities Plan which necessarily will have to be funded through Proposition 2% excluded debt.

Departmental General Fund Capital Budget Project Request Summary - FY22-26

TOWN OF FAIRHAVEN

PROJECT REQUEST RATING SHEET

DESCRIPTION OF RATING CRITERIA AND SCALES

CRITERIA A – OVERALL FISCAL IMPACT **Weight: 4**

Rationale: Limited resources for competing projects require that each project's full impact on the Town's budget be considered in rating and evaluating projects. Projects that are self-funded or have a large proportion of external funding will receive higher ratings than those that do not.

Considerations: Ratings for this factor will consider these major points:

A. Capital cost of the project relative to all other project requests.
B. Impact of project on Town operating costs and personnel levels.
C. Whether project requires Town appropriations or is funded from agency, grant funds, matching funds, or generated revenue.
D. Impact on Town tax revenue or fee revenue.
E. Will external funding be lost should the project be delayed?

Illustrative Ratings:

- 5 – Project requires less than 10% Town funding
- 4 – Project requires less than 50% Town funding
- 3 – Project requires more than 50% Town funding, decreases operating costs and increases Town revenues.
- 2 – Project requires more than 50% Town funding, increases operating costs and increases Town revenues.
- 1 – Project requires more than 50% Town funding, decreases operating costs and decreases Town revenues.
- 0 – Project requires more than 50% Town funding, increases operating costs and decreases Town revenues.

CRITERIA B – LEGAL OBLIGATIONS AND COMPLIANCE WITH MASTER PLAN **Weight: 4**

Rationale: Some projects are virtually unavoidable due to court orders, federal mandates, or state laws that require their completion. In addition, projects that advance an approved Town plan such as the School department strategic plan, the Board of Selectmen policy goals, or the soon-to-be updated Master Plan should receive higher consideration than those that do not. This criterion evaluates both the severity of the mandate and the degree of adherence to the Town's strategic goals.

Considerations: Ratings for this factor will consider these major point:

A. Whether an agency is under direct court order to complete this project.
B. Whether the project is needed to meet requirements of federal or state legislation.
C. Whether the project advances one or more of the Town's strategic goals.

Illustrative Ratings:

- 5 – Agency currently under court order to take action
- 4 – Project is necessary to meet existing state and federal requirements
- 3 – Project advances more than one of the Town's strategic goals
- 2 – Project advances one of the Town's strategic goals
- 1 – Legislation under discussion could require project in the future
- 0 – No legal or strategic goals impact or requirement
- -1 – Project requires change in state law to proceed
- -2 – Project requires change in federal law to proceed

CRITERIA C – IMPACT ON SERVICE TO THE PUBLIC **Weight: 3**

Rationale: Consideration will be given to capital projects that address health, safety, accreditation or maintenance issues as well as improved service of an agency. Service is broadly defined, as the Town's objective is to meet the health, safety, or accreditation needs of the population, and/or improved operations of an existing department.

Considerations: Ratings for this factor will consider three (3) major points:

A. Whether the service is already being provided by existing agencies.
B. Whether the project has immediate impact on service, health, safety, accreditation or maintenance needs.
C. Whether the project focuses on a service that is currently a "high priority" public need.

Illustrative Ratings:

- 5 – Service addresses an immediate public health, safety, accreditation, or maintenance need
- 4 – Service is improved and addresses a public health, safety, accreditation, or maintenance need
- 3 – Service is greatly improved
- 2 – Service is improved

- 1 – Service is minimally improved and addresses a public health, safety, accreditation, or maintenance need
- 0 – Service is minimally improved

CRITERIA D – URGENCY OF MAINTENANCE NEEDS **Weight: 3**

Rationale: The Town's most immediate goal in both capital and operating finance is to maintain current services expected by citizens, businesses, and visitors. Capital projects that are essential to maintain service, protect investment, or restore service that has been interrupted due to failure of capital assets will receive the highest rating in this criterion.

Considerations: Ratings for this factor will consider these major points:

A. Whether service is currently interrupted.
B. Whether the project as requested will result in full restoration of service.
C. Whether the project is the most cost-effective method of providing or maintaining service.
D. Where service is not currently interrupted, the likelihood that it will be in the next five (5) years if the project is not funded.
E. Whether costs of the project will increase (beyond inflation) if the project is delayed.
F. Whether the agency has prepared a comprehensive maintenance/rehabilitation/replacement schedule and the project is due under that schedule.

Illustrative Ratings:

- 5 – Service is currently interrupted, or will be interrupted in the next fiscal year, and the project will restore service in the most cost-effective manner possible
- 4 – Service is likely to be disrupted in the three (3) year horizon if project is not funded
- 3 – Project is necessary to maintain orderly schedule for maintenance and replacement
- 2 – Cost of Project will increase in the future (beyond inflation) if it is delated at this time
- 1 – Minor risk that the cost will rise or service will be interrupted if project is not funded
- 0 – There is no financial or service risk of delaying or not funding the project (e.g., the project is new and has no impact on current service)

CRITERIA E – PRIOR PHASES **Weight: 2**

Rationale: Some projects need to be developed in phases due to their complexity of size. In such cases, the need has already been established by prior commitment of funds to existing projects. Therefore, continuation of the project will be given higher consideration.

Considerations: Ratings for this factor will consider there major points:

A. Whether the project has received prior funds.
B. Whether the project requires additional funding to be operational.

Illustrative Ratings:

- 5 – All but the final phase has been fully funded
- 4 – Multiple phases have been fully funded
- 3 – Multiple phases have been partially funded
- 2 – First phases have been partially funded
- 1 – First phase has been partially funded
- 0 – No prior phases have been funded or partially funded

CRITERIA F – DEPARTMENTAL PRIORITY **Weight: 2**

Rationale: Divisions are expected to provide an indication of which projects are most important to their mission.

Considerations: Ratings for this factor will consider these major points:

A. Departmental ranking of each individual project.
B. The total number of project requests that are tuned in by entities.

Illustrative Ratings:

- 5 – Top 20% of highest departmentally ranked project requests
- 4 – 20% of next highest departmentally ranked project requests
- 3 – 20% of next highest departmentally ranked project requests
- 2 – 20% of next highest departmentally ranked project requests
- 1 – Bottom 20% of all project requests

Submitted by: Vincent Furtado
Title: BPW Supt
Date: 12/02/2020

Description

Replacement of 30 year old office tile.

Justification

Description of item to be replaced

Schedule for completion of project

Estimated value of replaced item: $0.00

NET Estimated Annual Impact: $0.00

Explanation

TileCraft
21 Arsene Way
Fairhaven, MA 02719

DURABILITY MEETS VERSATILITY

DESIGNED TO GET THE JOB DONE

The Sullair 375 series of portable compressors is ready to hit the ground running for a variety of job site applications. With 4 units in the family — including the 400HH featuring air pressures up to 200 psig — our diversified fleet is crafted with the most important ingredient of all: customer requirements. The modern design incorporates feedback from the front lines, which means the compressors we roll out are primed to perform at the job site. And all Sullair portable compressors are driven by the Legendary Sullair 16-Series Air End.

Compact Design
- Easier towing to and from the job site
- Improved maneuverability — fits more easily in smaller spaces
- More convenient storage — on the job site or at the yard

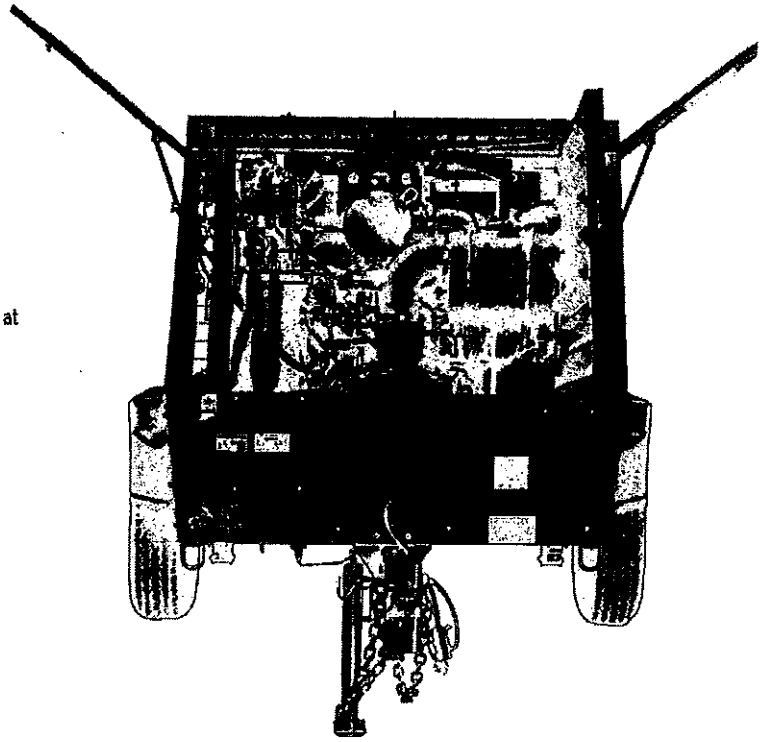
Easy Pressure Change
- Select models shift from low to high pressure with the flip of a switch

Quiet Operation
- 74 decibels at 23 feet operating at full load

Extended Runtime
- Oversized 65 gallon fuel tank
- Up to 10 hours of runtime at full load
  - 5–7% improvement in fuel consumption at full load compared to previous models

Easy Service and Maintenance
- Swing doors with slam latches to ensure doors stay open
- Easy access to key components including:
  - Cooler; aftercooler (if equipped); battery and battery disconnect
  - Compressor fluid filter
  - Compressor air filter
  - Engine filters

...and more



STANDARD FEATURES

- Legendary Sullair 16-Series Air End
- Low Fuel Shutdown
- Discharge Temperature Sensor
- Electric Brakes
- LED Tail, Turn and Clearance Lights
- Sullair AWF® All Weather Fluid — Factory Fill Lubricant

CUSTOMIZE YOUR COMPRESSOR

Options and Extras

- Cold weather package
- Jack caster with wheels
- Mechanical parking brake
- Single or dual hose reels (except 400HH)

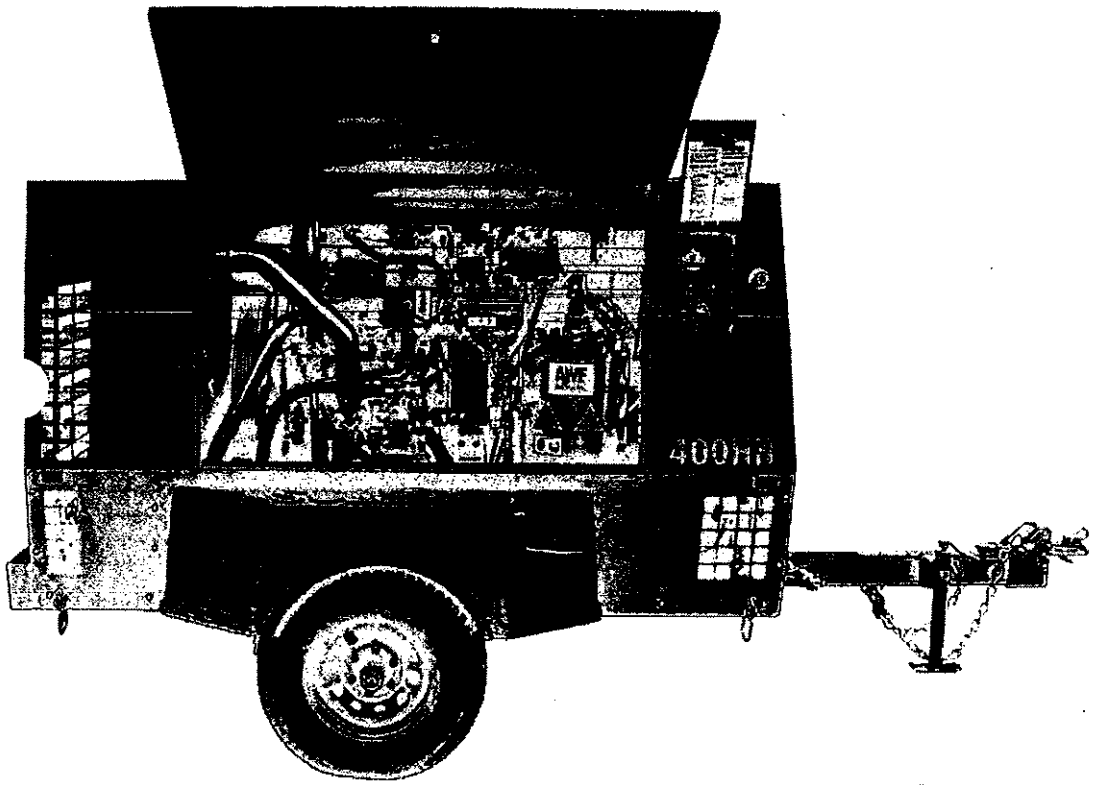
VALUE IN VERSATILITY

375 Series Applications

- General construction
- Abrasive blasting
- Optical fiber installation
- Plant backup air
- Pipeline work

...and more

All 375 Series models also available without running gear



SULLAIR.

Description

A review of existing conditions that will result in a design for paving and drainage improvements at the West Island Town Beach parking lot with pervious pavement to satisfy stormwater and Concom regulations. This effort will eliminate numerous year-long man- hours dedicated to grading this area and allow for much more organized beach parking - all while complying with applicable regulations.

Justification

Numerous complaints from Public safety and residents warrant this much overdue improvement.

ription of item to be replaced

Description

Plotter Scanner - $20,000;Plotter Scanner will efficiently print blueprints & scan all blue prints to our on-line permitting system for our residents/contractors.

Scan Documents, past & current - $40,000 to an on-line system format.

Justification

Plotter Scanner - The Plotter Scanner is a piece of machinery used to scan & print all blue prints for residents/contractors for efficiency.

The purpose of scanning all building files, Certificate of Inspections, Certificate of Occupancies need to be stored for all years permanently. Fairhaven has all files in an old system of paper files in numerous boxes and numerous spaces around Town Hall (which can be a fire hazard, never mind when you are trying to locate a previous file). By having all paper uploaded and scanned to an on-line system, it is efficient for residents and contractors to be able to see all work previously done and in the future.

Title: Deputy Fire Chief
Date: 12/02/2020

Description

We are requesting funding for two (2) Full Matrix Message Boards. These boards are used to place in the field that can provide notifications and emergency notifications to the citizens. The boards are a system of 12 Volt batteries that are charged from solar panels. The message boards can broadcast messages from any agency from the Town including, Fire, Police, Water, Sewer, Highway, Emergency Management, Health Department, and the Town Clerk. In addition, the message boards can show radar and traffic volume on particular roads to study needs and enforce traffic safety.

Justification

Currently, Town departments utilize message boards for the Town of Mattapoisett or the Town of Bridgewater. The increasing need from multiple departments has triggered this request for our own boards. In the past, the boards have been used to deliver messages which include water hydrant flushing, street closures, road race details, COVID 19 testing, EEE notifications, firework warning message, and stop sign notifications.

ɔcription of item to be replaced

Schedule for completion of project

Estimated value of replaced item: $0.00

NET Estimated Annual Impact: $0.00

Explanation

The boards have an LED shelf life of 10 years. The batteries will need to be replaced every two years. We are estimating annual maintenance of 500.00/year.

Trans Supply's operations are continuing as normal during the COVID-19 pandemic, construction is considered an essential business at this time.

Description

The roof currently needs to be replaced. The building which is town-owned will need to be maintained until a replacement location can be found for EMA. The roof is beyond its life span and beginning to leak. We are currently soliciting quotes for the project. Without the prevailing wage is was first quoted at $28,000. We added $12,000.00 to cover any anticipated prevailing wage costs.

Justification

We need to maintain the town building and ensure it will provide space and shelter for the EMA division. It is unknown the status of the new public safety complex. We will need to seriously look at this building pending the outcome of the public safety complex.

Description

Upgrade our existing Self Contained Breathing Apparatus (SCBA) which was purchased in 2007 on a federal grant. These SCBA's will reach their lifespan in 2022. Self Contained Breathing Apparatus is required by all Federal Regulations when entering into an Immediate Danger to Life and Health (IDLH) area. This will include 45 Airpacks with 90 air tanks and all necessary hardware and technology required by federal standards

Justification

Self Contained Breathing Apparatus is required by all Federal Regulations when entering into an Immediate Danger to Life and Health (IDLH) area. The SCBA's are the firefighter's airway protection in all types of fires and hazardous material incidents that we may encounter. The current SCBA is ending their life cycle and we will begin the process of trying to secure another Federal Grant to assist in paying for this item.
SCBA's are mandated by OSHA, NFPA, and recommended by all major professional organizations.

Description of item to be replaced

45 - 4.5 SCBA units. These units will be at the end of their life cycle.

Schedule for completion of project

Estimated value of replaced item: $0.00

NET Estimated Annual Impact: $12,000.00

Explanation

The self-contained breathing apparatus will have a 15-year lifespan. More importantly, firefighters are 33% more likely to develop cancer. These devices tend to reduce this percentage.

Title: Deputy Chief
Date: 12/03/2020

Description

The Fairhaven Fire & EMS Department is requesting $450,000.00 to replace a 35 y/o non NFPA compliant Fire Engine (Engine 2).
The forecast of the engine will mirror our current engines with a 1500 gallon per minute (GPM) pump and a 750-gallon tank. The Engine will contain equipment that will exceed the minimum NFPA recommendations and be outfitted with the latest Hurst ® tools and hazardous material mitigation equipment. The Engine will move to the 1st ude and we will downgrade the existing 2003 E-One Engine to reserve status.
Recommending long term plan for fire station cement or modification. New vehicles take up more apparatus space. Extensive planning/modification will need to be performed for either Station 2 or the main station to accommodate the new vehicle.

Justification

The Fairhaven Fire & EMS Department will replace a very old piece of equipment that is still in reserve capacity. The Engine purchased in 1984 is a 1000 GPM pump and a 500-gallon tank. This engine was on the front line for more than 15 years when it was placed into reserve capacity in 2003. Engine 2 currently is small and does not meet the current class 1 engine requirements. The packing around the engine as well as the air system is leaking. The engine and electronics are tired and need to be upgraded or replaced. However, parts for this style and age of the Engine are hard to come by. This unit required over $10,000.00 in repairs in FY20 and the frame is showing extensive wear and corrosion. It is not expected to last two more years.

Description of item to be replaced

The 1984 Ford Ranger Engine will be taken out of service. The Apparatus study committee will advise on their recommendation on a trade-in, sale, or a scrap of the Engine at funding time.

Schedule for completion of project

9 Months from time of order.

Estimated value of replaced item: $0.00

NET Estimated Annual Impact: $27,500.00

Explanation

The estimated life span under NFPA recommendations is twenty (20) years.

Description

AMKUS battery Operated Tools with batteries and Charges. The hydraulic tools are used for the technical rescue of individuals from being entrapped in vehicles, marine vessels, and buildings. This package includes a cutter, spreader, spreading ram, batteries, and chargers.

Justification

The Fairhaven Fire Department prides itself on its ability to respond to handle a variety of emergencies. We also provide redundancy with all our equipment two be able to handle two emergencies at one time. Currently, the first run piece is equipped with these battery tools which were funded three years prior. This group of equipment would be placed on Engine 4 which currently has a gas-powered unit. This current unit is out of date and leaking. We can no longer find a service tech or parts to repair the unit.

Description

The Marine Resources Department is requesting $50,207.06 to replace a 12 year old truck that is to be used by the Marine Resources Deputies. The new vehicle will replace a truck which has been told to us by DOT inspectors that it will not pass inspection this year. The vehicle will be stocked by a Chevrolet manufacturer and will be outfitted with the necessary emergency lighting, radios, antennas, and scanner to accommodate the at to [illegible] business by the operator.

Justification

To replace an 11 year-old truck. To keep 10 year rotation on vehicles. The vehicles are around the salt water every day that takes a toll on the vehicle. The vehicle I received a quote on has a Utility Body on it so it can be used for Oil Spills and other safety equipment. It all so can carry the tools around that are needed on a day to day basis.

Title:
Date: 12/07/2020

Description

Presently the vessel is used to do Propagation and routine maintenance work such as installation and removal of marker buoys. It is 15 plus years old. The wiring is a mess and it has cracks in the transom areas and the hull is damaged due to rock encounters during transplant work in the coves. (We are upgrading the motor this year, 2016, with money used from grant.) $2,014 added to install motor that we already have onto the new boat. $1690.00 added for equipment on the boat; gps, anchor, marine radio.

Justification

The Town of Fairhaven has approximately 30 miles of coastline that attracts recreational water activities such as shell fishing , boating , kayaking , swimming , and jet skis. There are extensive areas that are very shallow , preventing bigger watercraft from gaining access,and to make day to day work safer.

Submitted by: Christopher Camara
Title: Director of Technology
Date: 12/02/2020

Description

The attached proposal reflects the cost of equipment and labor to replace the telephone system throughout the Town and Schools with an IP based system. A VoIP phone or IP phone uses voice over IP technologies for placing and transmitting telephone calls over the Fiber network eliminating the need for the existing Verizon telephone lines. There is also $18,000 added to the proposal to cover the cost of wiring existing sites that do not have the appropriate cabling in place.

Justification

Currently, each Town department is functioning via an analog telephone system. Over the past few years, there have been many issues related to the existing phone system and Verizon lines for both the Town and the School Departments. By moving to an IP based solution, the upgrade would allow every department to have a unified phone system rather than five (5) different systems, with five (5) different vendors creating one phone network which would be centrally managed. Finally, the upgraded phone system would eliminate all of the Verizon lines in the Town, resulting in an estimated cost savings of $12,000/year.

ɔription of item to be replaced

All telephone systems throughout all Town Departments

Schedule for completion of project

6 months.

Estimated value of replaced item: $0.00

NET Estimated Annual Impact: $0.00

Christopher Camara
Fairhaven Public Schools

Dear Nicole:

Future Technologies Group, LLC dba New Era Technology NE (New Era), is pleased to provide our proposal to Fairhaven Public Schools. Thank you for the opportunity to respond and for your consideration.

New Era is a Massachusetts based technology solutions provider, incorporated in 2004, committed to delivering "best-of-breed" information technology solutions. We are conveniently located at 2 Batterymarch Park, Suite 401, Quincy, MA 02169, in close proximity to Boston, with easy access to Routes 128, I95, I93 and 495. We maintain our 24x7x365 live-staffed Network Operations Center (NOC) at the same address, and we maintain an equipment warehouse with critical spare equipment at Shawmut St. Canton, MA. New Era is a proud member of Local Union 103 and complies with all prevailing wage requirements.

New Era has a long-standing track record as a technology solutions provider within the Commonwealth and, after stringent reviews of our qualifications, services, and product offerings, New Era has been awarded positions on various Commonwealth Statewide Technology Contracts including ITT50 (Converged Voice and Data Communication Systems, Services & Equipment), ITC68 (Data Cable Products), ITC47 (Information Technology Hardware, Project Management, Integration and Maintenance), and ITS53 (IT Project Services). New Era is also an approved vendor on the Massachusetts Higher Education Consortium (MHEC) Contract MC13-E05 (Fire, Security, Surveillance, Communication, Access Control Equipment, Systems Services and Supplies) and MHEC E05 (Security & Emergency Communications Contract).

Thank you for the opportunity to respond to the Request for Proposal, for your consideration and for the opportunity to continue to provide service for Fairhaven Public Schools.

Sincerely,

Joe Gillis

Joe Gillis
New Era Technology NE

New Era Technology NE Company Overview

New Era Technology NE is a Massachusetts based technology solutions provider, committed to delivering best-of-breed information technology solutions. Our multi-disciplined approach allows our team to offer specialized IT solutions packages to meet the unique needs of our customers. Our team of professionals has been providing voice, data, and IT solutions for nearly three decades.

Our portfolio of services includes data networking, 24/7 network monitoring, telecommunications, call center applications, voice/data/fiber cabling services, network security/access, managed services, and many others. We have assembled the finest team of professionals in customer support, engineering, account management and technical services. Comprised of seasoned technology professionals who average more than fifteen (15) years' experience each, NEW ERA is uniquely positioned to achieve customer goals by bridging multiple technical disciplines, from simple infrastructure installations to highly complex deployments, and everything in between.

NEW ERA's core competencies include design, installation and 24/7 maintenance for:

- ✓ Data Networking/Switching/Routing
- ✓ Fiber Optic Cabling Systems
- ✓ Voice / Data Cabling Systems
- ✓ Access Control Solutions
- ✓ Wide Area Network Solutions
- ✓ Network Security Solutions
- ✓ Video Surveillance Solutions
- ✓ Wireless Networking

The NEW ERA team brings broad-based technical experience, extensive credibility based on current and past installation and maintenance performance, and a comprehensive understanding of the sense of urgency that is required when working with customers. NEW ERA is known for responsiveness, quality, integrity and commitment. Our team's unparalleled reputation has stood the test of time and continues to provide cost effective solutions and service, while exceeding customer expectations.

Our staff possesses certifications and accreditations that bridge multiplatform technologies as well as years of experience in guiding customers through converging technologies. NEW ERA requires that all systems technicians undergo continuous training to remain current on systems updates and emerging technologies. Systems manufacturers advise NEW ERA, via email, of the technical status of existing systems, as well as overviews of new product offerings. Our manufacturers also mandate the specific requirements for technical support personnel to acquire in order to retain product level certifications.

NEW ERA has unparalleled knowledge and experience in delivering best-of-breed maintenance and support services. NEW ERA operates a live-staffed 24x7x365 Network Operations Center ("NOC") located at 2 Batterymarch Park, Suite 401, Quincy, MA, from which all maintenance service technicians are dispatched. Our logistics and warehouse facilities, where critical maintenance service components are stored, are located at 258 Willard Street, Quincy, MA 02169. These facilities are strategically close in proximity to Routes 93, 95, 24, 495 and I90. NEW ERA field service technicians have 24 hour access to our facilities, and also maintain critical spare components on their home-garaged company vehicles

Avaya Partnership

New Era Technology is an Avaya Diamond Business Partner and its team of professionals has been successfully delivering Avaya & Nortel enterprise solutions for over 12 years. Members of our staff have been successfully delivering Avaya & Nortel solutions for more than 25 years, some of whom were former Avaya Tier 3 and Tier 4 Engineers. We are a Unified Communications (UC) Expert, Contact Center (CC) Expert and Unified Messaging (UM) Expert and we have achieved the Avaya SME Expert distinction. FTG is also an Avaya Co-Delivery Partner, which is awarded only after Avaya performs an in-depth and strenuous on-site assessment of New Era's operations, procedures and certifications.

Commonwealth Experience

Members of NEW ERA's staff have worked with government agencies, cities, towns and school systems for over 25 years. NEW ERA is a proud member of IBEW Local Union 103, and as such, NEW ERA technicians are paid at or above prevailing wage rates and receive continuous training on industry standards and safety. We are an approved vendor on a number of Commonwealth of Massachusetts Statewide Contracts, including:

- Converged Voice/Data Communication Systems, Services & Equipment (ITT50),
- Data Cable & Fiber Optic Products (ITC68),
- IT Project Services & Consulting (ITS53),
- IT Hardware, Project Management, Integration and Maintenance (ITC47),
- DCAMM Certification (Telecom)
- Massachusetts Broadband Initiative (MBI) Letter of Intent (LOI)
- Massachusetts Higher Education Consortium (MHEC) Contract MC13-J06, IT Project Services
- Massachusetts Higher Education Consortium (MHEC) Contract MC13-E05, Fire/Security/Emergency Communication: Equipment, Service & Supplies

Staffing

New Era Technology NE is locally based and staffed to support projects awarded under this RFQ, with approximately one hundred (120) employees based in our Quincy, MA location. In addition, NEW ERA is a union company and a proud member of the International Brotherhood of Electrical Workers' Local Union 103. As a union company, NEW ERA has access to as many technicians as we may need to adjust to our business requirements and project engagements.

As 103 members, our union technicians attend one of the highest-rated and most prestigious apprenticeship programs in the country. The Boston Joint Apprenticeship and Training Committee (JATC) Training Program was created jointly by the International Brotherhood of Electrical Workers, Local 103, and the Greater Boston Chapter of the National Electrical Contractors Association (NECA) with one goal — to produce the most highly skilled and professional technicians in the industry. The Greater Boston JATC Training Center offers 56,000 square feet of facilities that include thirteen classrooms, eleven shops, three computer labs, a drafting room, seminar rooms, administrative and student areas, and an auditorium. The Greater Boston JATC Training Program is accredited by several state and federal agencies,

such as the Massachusetts State Department of Labor and Workforce Development, and the U.S. Department of Labor. The apprenticeship is a five-year program.

The NEW ERA team brings broad-based technical experience, an intimate knowledge of various Commonwealth agencies' existing information technology platforms, extensive credibility based on current and past installation and maintenance performance, and a comprehensive understanding of the sense of urgency that is required when working with the Commonwealth. NEW ERA personnel have unparalleled experience dealing specifically with Commonwealth of Massachusetts' data networking and structured cabling systems and a coverage area that today embraces every geographic locale within our State's boundaries. NEW ERA is known for responsiveness, quality, integrity and commitment. Our team's unparalleled reputation has stood the test of time and continues to provide cost effective solutions and service, while exceeding customer expectations. Our team has a well-deserved reputation for performance, integrity, honesty and commitment to excellence on behalf of our Commonwealth customers, as reflected in past Open Ratings Performance Evaluation Reports.

The members of our team have installed, serviced and maintained some of the largest and most prevalent state-wide LAN/WAN systems within the Commonwealth. NEW ERA is the current vendor of choice for many high profile entities within the Commonwealth, including: MassDOT, the Massachusetts State Senate, Massachusetts House of Representatives, Office of the State Treasurer, Office of the Secretary of State, and Division of Capital Asset Management.

New Era Technology has deployed the Avaya IP Office solution in the Town of Wellesley, City of Peabody/Peabody Public Schools, Weymouth Public Schools and the City of Franklin.

Our field services organization is among the most equipped and empowered within the State of Massachusetts. NEW ERA furnishes its technicians and engineering staff with Smartphone devices, laptops, wireless access and company vehicles that are home-garaged, thereby allowing NEW ERA to dispatch and/or re-direct staff on a moment's notice throughout the State of Massachusetts.

Description

Replacement of two marked police cruisers, mobile data terminals and police radios.

Justification

The police department replaces two vehicles per year by a rotation system which optimizes the use and value of the vehicles. The vehicles are used for five years as primary vehicles, at which time they reach an excess of 100,000 miles. They are then kept for another two years in a back up roll where they accumulate an additional 30,000 miles. The mobile data terminals are laptop computers with software platforms that reach a shelf life after approximately three years, requiring them to be replaced. Also included in this quote is the cost for a new police radio. We recently upgraded to Motorola radios, which requires us to purchase the new radio units. The reason for the increased costs of the vehicle is due to the hybrid engine, which complies with the Town-wide Vehicle Policy.

Description of item to be replaced

Two older model police cruisers.

Schedule for completion of project

Estimated value of replaced item: $0.00

Description

Replacement vehicle for the Animal Control Officer. The funding for the cost of this vehicle will be split between the Town's General Fund, and the Animal Shelter Gift Account.

Justification

Current vehicle is in poor condition, and is no longer suitable for safe transport of animals, and does not meet the demands of the duties of the Animal Control Officer.

Description of item to be replaced

2012 Ford XL Van.

Schedule for completion of project

Estimated value of replaced item: $2,500.00

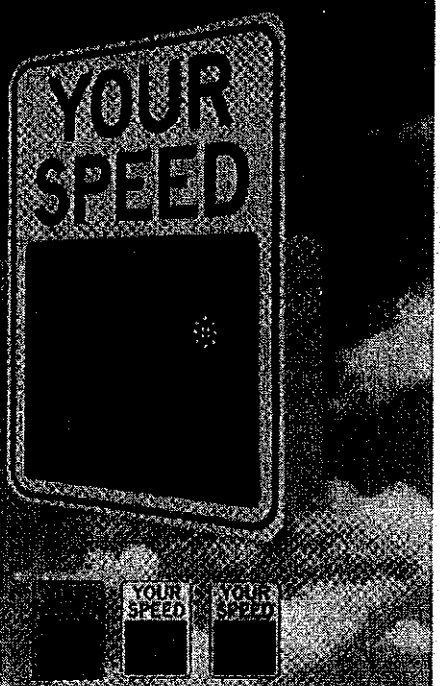
SafePace® Evolution 12



The Traffic Logix SafePace® The TL SafePace Evolution 12 driver feedback sign is the compact, economical sign with MUTCD approved 12" digits.

The SafePace Evolution 12 is a compact, portable sign with the cost benefit and small footprint of an entry-level sign but larger 12" digits that meet MUTCD approval. Offering speed activated digit color changes as well as the ability to display up to 3 digits, the SafePace Evolution 12 is a small sign with big impact.

EV 12 Specifications

Features
Enlarged Sign Digits: The bestselling, compact SafePace sign, now available with slightly larger digits for improved visibility.
Dual Color Display: LED digit color can be programmed to change based on driver speed.
User-Friendly: Software interface is user friendly and can be programmed to set sign parameters quickly and easily. Optional data collection allows you to download traffic data and generate statistical reports from anywhere with SafePace Cloud.
Stealth Mode: Baseline traffic data can be collected for comparison and analysis while speed display appears blank to motorists.
Speed Violator Strobe: Programmable flashing strobe alerts drivers to slow down when they exceed the threshold speed you choose.
Universal Mounting: Optional mounting brackets let you use one sign at multiple locations with the turn of a key.
Superior construction and durability for long-lasting performance.

Description

One (1) 25 x 53 (1325sqft) Steel storage garage unit

Justification

The Elizabeth Hastings Middle School contains 5 dated storage bins/units. These storage bins/units currently hold some of our grounds and athletic equipment. The Fairhaven Public Schools is looking to purchase one 25x53(1325sqft) covered metal structure to store our grounds, maintenance, and athletic equipment. Currently, this equipment is sitting outside in the elements for 365 days a year and as a result, is deteriorating faster than expected and shortening it's life expectancy. This is a one-time purchase as this structure will provide needed protection for the equipment that is currently exposed to the elements to prolong its prolong the equipment's lifespan. The estimated costs includes prevailing wage costs.

Explanation

COMPLETE METAL BUILDING AND GENERAL CONTRACTING SERVICE - INCORPORAT

March 11, 2020

Fairhaven Public Schools
19 County Road
Fairhaven, MA 02719

RE: Fairhaven Schools Storage Building

Mrs. Nicole Verronneau Potter,

Cape Building Systems Inc. proposes to provide a 25' wide by 53'-4" long x 21'-6" High Eave (19'-4" Low Eave) pre-engineered metal building by Star Buildings on a site 30 School Street, Fairhaven, MA. The complete job has been priced using estimated prevailing wage rates from the state of MA to obtain the labor costs for the project.

Sitework: *Direct Cost: $41,225*

1. Cutting Asphalt and removal of from site.
2. Excavation and backfill for a 4' foundation system.
3. Excavation and backfill for interior under-slab piping of floor drains.
4. Fine grade and installation of 9" of Gravel for Slab on grade floor.
   Patching of 600 SF of Asphalt at perimeter of the building foundation and MDC Trap.

Concrete: *Direct Cost: $44,223*

1. 157 LF of 3'-6" reinforced 10" thick foundation wall with footings and Piers as required for the metal building installation.
2. 1,325 SF of 5" reinforced concrete slab with burnished finish over vapor barrier and 9" of Gravel.

Pre-Engineered Metal Building: *Direct Cost: $69,275*

1. Furnish and install a 25' wide by 53'-4" long addition 21'-6' high eave height (19'-4" Low Eave).
2. Designed for latest snow and wind loads as well as additional 2# collateral load for lights, and 3# load for future solar panels.
3. Roof pitches at 1" per foot single slope.
4. Roof shall be 24 ga. Battenlok HS standing seam roof with 8" Fiberglass Sag-Bag insulation. Panel configuration allows for solar panel attachment without thru the roof connectors utilizing S-5 aluminum non piercing clamp system at a later time.
5. Walls shall be 26 ga. R panels with 5" R-13 insulation.

Framing & Finish Work: *Direct Cost: $31,500*

1. 500 SF of 6" Partition with ¼" FT plywood finish at school department/ facilities department demising wall.
2. 500 SF of 3 5/8" Partition with ¼" FT plywood finish at Athletic to school department demising wall.
3. Athletic department mezzanine with 16ga joists and ¾" FT Plywood.
4. Interior wood Stairs to the mezzanine.

Electrical: *Direct Cost: $17,525*

1. Furnish and install of all material and labor for 100 amp electrical service from overhead (using the empty existing pole).
2. Installation f 4 receptacles in each bay for a total of 16 receptacles.
3. Install 3-8ft LED fixtures in each bay with a switch to each.
4. Installation of 4 LED exterior Wall pack lights.

Plumbing: *Direct Cost: $22,000*

1. Installation of under-slab garage waste piping (Service weight cast iron).
2. Vent Piping for floor drains and MDC trap (to be no-hub cast iron).
3. Purchase and installation of 3 -9" round floor drains in garage area piped to exterior MDC trap.

Mechanical: *Direct Cost: $15,500*

1. Equipment & materials for furnishing and installation of 3 Modine unit heaters and piping. Assumed to be fed from Propane tank by others.
    a. 2 – 75,000BTU units
    b. 1 – 30,000BTU unit
    c. Venting through backwall of building.

General Conditions

1. General Conditions and all supervision.
2. In house project manager/ Architectural services by Jason Maurer, AIA.
3. Provided Commercial General Liability Insurance of:
    a. 1 Million per Occurrence
    b. 2 Million general Aggregate
    c. Automobile Liability of $1 Million
    d. Umbrella Liability of $5 Million
    e. Workers Compensation of $500,000
    f. Equipment Leased/ Rented $50,000

66

apital Plan Submission Supporting Docs.pdf (page 2 of 5)

1. Interior painting of new interior work.
2. Flooring or wall base of any kind.

The budget cost for the work described shall be at a cost of:

$322,146

The permit fee is estimated at $3,222 (1% of Construction) and not included above.

Sincerely,

Jason Maurer, AIA

Project Manager/ Architect
13 Industrial Drive
Mattapoisett, MA 02739
