B. Findings

1. Findings pursuant to the Massachusetts Wetlands Protection Act:

Following the review of the above-referenced Notice of Intent and based on the information provided in this application and presented at the public hearing, this Commission finds that the areas in which work is proposed is significant to the following interests of the Wetlands Protection Act (the Act). Check all that apply:

- | | | |
|--|--|---|
| a. <input type="checkbox"/> Public Water Supply | b. <input type="checkbox"/> Land Containing Shellfish | c. <input checked="" type="checkbox"/> Prevention of Pollution |
| d. <input type="checkbox"/> Private Water Supply | e. <input type="checkbox"/> Fisheries | f. <input checked="" type="checkbox"/> Protection of Wildlife Habitat |
| g. <input type="checkbox"/> Groundwater Supply | h. <input checked="" type="checkbox"/> Storm Damage Prevention | i. <input checked="" type="checkbox"/> Flood Control |

2. This Commission hereby finds the project, as proposed, is: (check one of the following boxes)

Approved subject to:

- a. the following conditions which are necessary in accordance with the performance standards set forth in the wetlands regulations. This Commission orders that all work shall be performed in accordance with the Notice of Intent referenced above, the following General Conditions, and any other special conditions attached to this Order. To the extent that the following conditions modify or differ from the plans, specifications, or other proposals submitted with the Notice of Intent, these conditions shall control.

B. Findings (cont.)

Denied because:

- b. the proposed work cannot be conditioned to meet the performance standards set forth in the wetland regulations. Therefore, work on this project may not go forward unless and until a new Notice of Intent is submitted which provides measures which are adequate to protect the interests of the Act, and a final Order of Conditions is issued. **A description of the performance standards which the proposed work cannot meet is attached to this Order.**

The following conditions are only applicable to Approved projects.

1. Failure to comply with all conditions stated herein, and with all related statutes and other regulatory measures, shall be deemed cause to revoke or modify this Order.
2. The Order does not grant any property rights or any exclusive privileges; it does not authorize any injury to private property or invasion of private rights.
3. This Order does not relieve the permittee or any other person of the necessity of complying with all other applicable federal, state, or local statutes, ordinances, bylaws, or regulations.
4. The work authorized hereunder shall be completed within three years from the date of this Order unless either of the following apply:
 - a. The work is a maintenance dredging project as provided for in the Act; or
 - b. The time for completion has been extended to a specified date more than three years, but less than five years, from the date of issuance. If this Order is intended to be valid for more than three years, the extension date and the special circumstances warranting the extended time period are set forth as a special condition in this Order.
 - c. If the work is for a Test Project, this Order of Conditions shall be valid for no more than one year.
5. This Order may be extended by the issuing authority for one or more periods of up to three years each upon application to the issuing authority at least 30 days prior to the expiration date of the Order. An Order of Conditions for a Test Project may be extended for one additional year only upon written application by the applicant, subject to the provisions of 310 CMR 10.05(11)(f).
6. If this Order constitutes an Amended Order of Conditions, this Amended Order of Conditions does not extend the issuance date of the original Final Order of Conditions and the Order will expire on 10/19/2025 unless extended in writing by the Department.
7. Any fill used in connection with this project shall be clean fill. Any fill shall contain no trash, refuse, rubbish, or debris, including but not limited to lumber, bricks, plaster, wire, lath, paper, cardboard, pipe, tires, ashes, refrigerators, motor vehicles, or parts of any of the foregoing.

C. General Conditions Under Massachusetts Wetlands Protection Act

8. This Order is not final until all administrative appeal periods from this Order have elapsed, or if such an appeal has been taken, until all proceedings before the Department have been completed.
9. No work shall be undertaken until the Order has become final and then has been recorded in the Registry of Deeds or the Land Court for the district in which the land is located, within the chain of title of the affected property. In the case of recorded land, the Final Order shall also be noted in the Registry's Grantor Index under the name of the owner of the land upon which the proposed work is to be done. In the case of the registered land, the Final Order shall also be noted on the Land Court Certificate of Title of the owner of the land upon

which the proposed work is done. The recording information shall be submitted to the Conservation Commission on the form at the end of this Order, which form must be stamped by the Registry of Deeds, prior to the commencement of work.

10. A sign shall be displayed at the site not less than two square feet or more than three square feet in size bearing the words,

“Massachusetts Department of Environmental Protection” [or, “MassDEP”]

“File Number SE 023-1428 ”

11. Where the Department of Environmental Protection is requested to issue a Superseding Order, the Conservation Commission shall be a party to all agency proceedings and hearings before MassDEP.
12. Upon completion of the work described herein, the applicant shall submit a Request for Certificate of Compliance (WPA Form 8A) to the Conservation Commission.
13. The work shall conform to the plans and special conditions referenced in this order.
14. Any change to the plans identified in Condition #13 above shall require the applicant to inquire of the Conservation Commission in writing whether the change is significant enough to require the filing of a new Notice of Intent.
15. The Agent or members of the Conservation Commission and the Department of Environmental Protection shall have the right to enter and inspect the area subject to this Order at reasonable hours to evaluate compliance with the conditions stated in this Order, and may require the submittal of any data deemed necessary by the Conservation Commission or Department for that evaluation.
16. This Order of Conditions shall apply to any successor in interest or successor in control of the property subject to this Order and to any contractor or other person performing work conditioned by this Order.

C. General Conditions Under Massachusetts Wetlands Protection Act (cont.)

17. Prior to the start of work, and if the project involves work adjacent to a Bordering Vegetated Wetland, the boundary of the wetland in the vicinity of the proposed work area shall be marked by wooden stakes or flagging. Once in place, the wetland boundary markers shall be maintained until a Certificate of Compliance has been issued by the Conservation Commission.
18. All sedimentation barriers shall be maintained in good repair until all disturbed areas have been fully stabilized with vegetation or other means. At no time shall sediments be deposited in a wetland or water body. During construction, the applicant or his/her designee shall inspect the erosion controls on a daily basis and shall remove accumulated sediments

as needed. The applicant shall immediately control any erosion problems that occur at the site and shall also immediately notify the Conservation Commission, which reserves the right to require additional erosion and/or damage prevention controls it may deem necessary. Sedimentation barriers shall serve as the limit of work unless another limit of work line has been approved by this Order.

19. The work associated with this Order (the "Project")

- (1) is subject to the Massachusetts Stormwater Standards
 (2) is NOT subject to the Massachusetts Stormwater Standards

If the work is subject to the Stormwater Standards, then the project is subject to the following conditions:

- a) All work, including site preparation, land disturbance, construction and redevelopment, shall be implemented in accordance with the construction period pollution prevention and erosion and sedimentation control plan and, if applicable, the Stormwater Pollution Prevention Plan required by the National Pollution Discharge Elimination System Construction General Permit as required by Stormwater Condition 8. Construction period erosion, sedimentation and pollution control measures and best management practices (BMPs) shall remain in place until the site is fully stabilized.
- b) No stormwater runoff may be discharged to the post-construction stormwater BMPs unless and until a Registered Professional Engineer provides a Certification that:
- i.* all construction period BMPs have been removed or will be removed by a date certain specified in the Certification. For any construction period BMPs intended to be converted to post construction operation for stormwater attenuation, recharge, and/or treatment, the conversion is allowed by the MassDEP Stormwater Handbook BMP specifications and that the BMP has been properly cleaned or prepared for post construction operation, including removal of all construction period sediment trapped in inlet and outlet control structures;
 - ii.* as-built final construction BMP plans are included, signed and stamped by a Registered Professional Engineer, certifying the site is fully stabilized;
 - iii.* any illicit discharges to the stormwater management system have been removed, as per the requirements of Stormwater Standard 10;

C. General Conditions Under Massachusetts Wetlands Protection Act (cont.)

- iv.* all post-construction stormwater BMPs are installed in accordance with the plans (including all planting plans) approved by the issuing authority, and have been inspected to ensure that they are not damaged and that they are in proper working condition;
 - v.* any vegetation associated with post-construction BMPs is suitably established to withstand erosion.
- c) The landowner is responsible for BMP maintenance until the issuing authority is notified that another party has legally assumed responsibility for BMP maintenance. Prior to requesting a Certificate of Compliance, or Partial Certificate of Compliance, the responsible party (defined in General Condition 18(e)) shall execute and submit to the issuing authority

Massachusetts Department of Environmental Protection

an Operation and Maintenance Compliance Statement (“O&M Statement”) for the Stormwater BMPs identifying the party responsible for implementing the stormwater BMP Operation and Maintenance Plan (“O&M Plan”) and certifying the following:

- i.) the O&M Plan is complete and will be implemented upon receipt of the Certificate of Compliance, and
 - ii.) the future responsible parties shall be notified in writing of their ongoing legal responsibility to operate and maintain the stormwater management BMPs and implement the Stormwater Pollution Prevention Plan.
- d) Post-construction pollution prevention and source control shall be implemented in accordance with the long-term pollution prevention plan section of the approved Stormwater Report and, if applicable, the Stormwater Pollution Prevention Plan required by the National Pollution Discharge Elimination System Multi-Sector General Permit.
- e) Unless and until another party accepts responsibility, the landowner, or owner of any drainage easement, assumes responsibility for maintaining each BMP. To overcome this presumption, the landowner of the property must submit to the issuing authority a legally binding agreement of record, acceptable to the issuing authority, evidencing that another entity has accepted responsibility for maintaining the BMP, and that the proposed responsible party shall be treated as a permittee for purposes of implementing the requirements of Conditions 18(f) through 18(k) with respect to that BMP. Any failure of the proposed responsible party to implement the requirements of Conditions 18(f) through 18(k) with respect to that BMP shall be a violation of the Order of Conditions or Certificate of Compliance. In the case of stormwater BMPs that are serving more than one lot, the legally binding agreement shall also identify the lots that will be serviced by the stormwater BMPs. A plan and easement deed that grants the responsible party access to perform the required operation and maintenance must be submitted along with the legally binding agreement.
- f) The responsible party shall operate and maintain all stormwater BMPs in accordance with the design plans, the O&M Plan, and the requirements of the Massachusetts Stormwater Handbook.

C. General Conditions Under Massachusetts Wetlands Protection Act (cont.)

- g) The responsible party shall:
 1. Maintain an operation and maintenance log for the last three (3) consecutive calendar years of inspections, repairs, maintenance and/or replacement of the stormwater management system or any part thereof, and disposal (for disposal the log shall indicate the type of material and the disposal location);
 2. Make the maintenance log available to MassDEP and the Conservation Commission (“Commission”) upon request; and
 3. Allow members and agents of the MassDEP and the Commission to enter and inspect the site to evaluate and ensure that the responsible party is in compliance

with the requirements for each BMP established in the O&M Plan approved by the issuing authority.

- h) All sediment or other contaminants removed from stormwater BMPs shall be disposed of in accordance with all applicable federal, state, and local laws and regulations.
- i) Illicit discharges to the stormwater management system as defined in 310 CMR 10.04 are prohibited.
- j) The stormwater management system approved in the Order of Conditions shall not be changed without the prior written approval of the issuing authority.
- k) Areas designated as qualifying pervious areas for the purpose of the Low Impact Site Design Credit (as defined in the MassDEP Stormwater Handbook, Volume 3, Chapter 1, Low Impact Development Site Design Credits) shall not be altered without the prior written approval of the issuing authority.
- l) Access for maintenance, repair, and/or replacement of BMPs shall not be withheld. Any fencing constructed around stormwater BMPs shall include access gates and shall be at least six inches above grade to allow for wildlife passage.

Special Conditions (if you need more space for additional conditions, please attach a text document):

See Attachment A.

- 20. For Test Projects subject to 310 CMR 10.05(11), the applicant shall also implement the monitoring plan and the restoration plan submitted with the Notice of Intent. If the conservation commission or Department determines that the Test Project threatens the public health, safety or the environment, the applicant shall implement the removal plan submitted with the Notice of Intent or modify the project as directed by the conservation commission or the Department.

D. Findings Under Municipal Wetlands Bylaw or Ordinance

- 1. Is a municipal wetlands bylaw or ordinance applicable? Yes No
- 2. The Fairhaven Conservation Commission hereby finds (check one that applies):
 - a. that the proposed work cannot be conditioned to meet the standards set forth in a municipal ordinance or bylaw, specifically:

1. Municipal Ordinance or Bylaw

2. Citation

**Massachusetts Department of Environmental Protection
Bureau of Resource Protection - Wetlands**

City/Town

Therefore, work on this project may not go forward unless and until a revised Notice of Intent is submitted which provides measures which are adequate to meet these

- b. that the following additional conditions are necessary to comply with a municipal ordinance or bylaw:

Fairhaven Wetlands Bylaw

Ch.192

1. Municipal Ordinance or Bylaw

2. Citation

- 3. The Commission orders that all work shall be performed in accordance with the following conditions and with the Notice of Intent referenced above. To the extent that the following conditions modify or differ from the plans, specifications, or other proposals submitted with the Notice of Intent, the conditions shall control.

The special conditions relating to municipal ordinance or bylaw are as follows (if you need more space for additional conditions, attach a text document):
See Attachment A.

TOWN OF FAIRHAVEN, MASSACHUSETTS

CONSERVATION COMMISSION

Town Hall · 40 Center Street · Fairhaven, MA 02719

Attachment A

DEP File #: SE 023-1428
Fairhaven File #: CON 023-368
Applicant: Natalie Caetano
Property: 43 Reservation Road, Map 29A, Lot 351
Date: 10/10/2023

Findings, Plans, and Documents

1. 43 Reservation Road, Map 29A, Lot 351 has/have been identified as a Resource Area(s) subject to protection under the Wetlands Protection Act (M.G.L. ch. 131 § 40) and Regulations (310 CMR 10.00) and the Fairhaven Wetlands Bylaw (Chapter 192). The 100-foot buffer zone has been identified as a resource area subject to protection under the Fairhaven Wetlands Bylaw (Chapter 192).
2. Bordering vegetated wetlands are likely to be significant to public or private water supply, to groundwater supply, to flood control, to storm damage prevention, to prevention of pollution, and to wildlife habitat. Plants and soils of bordering vegetated wetlands remove or detain sediments, nutrients, and toxic substances that occur in run-off and flood waters.
3. All coastal dunes are likely to be significant to storm damage prevention and flood control, and all coastal dunes on barrier beaches and the coastal dune closest to the coastal beach, in any area are significant to storm damage prevention and flood control. Coastal dunes are also often significant to the protection of wildlife habitat.
4. Land subject to coastal storm flowage is likely to be significant to flood control and storm damage prevention. LSCSF can slow down flood waters and allow them to flow across a natural landform surface, providing frictional resistance and reducing their energy and destruction potential. It can allow flood waters to spread over a wide area without obstructions. Obstructions can cause the channelization of flood waters and storm-wave overwash and an increase in the velocity and volume of flow to adjacent or landward areas. LSCSF can also allow flood waters to be detained, absorbed into the ground, or evaporated into the atmosphere. LSCSF also protects the land from storm erosion by providing a substrate for vegetation that helps to stabilize sediments and slow down flood waters.
5. This permit authorizes the resurfacing of a driveway which has already been completed, and the addition of a circular 16' diameter brick patio/sitting area with associated landscaping located at 43 Reservation Road, Map 29A, Lot 351, as shown on the Final Approved Plans referenced in this Attachment A. No other work is approved by this Order.
6. This project is subject to the Town of Fairhaven Wetlands Bylaw (Chapter 192) and its regulations. Receipt of an Order of Conditions satisfies the requirements under the Wetlands Bylaw.
7. This project is subject to the Town of Fairhaven Stormwater Management Bylaw (Chapter 194). Receipt of an Order of Conditions satisfies the requirements under the Stormwater Management Bylaw.

8. The Plan-of-Record is titled "90 Seaview Avenue", prepared by Sara Rawson, dated 10/12/22.

Special Conditions

A. General Conditions

1. Section C, the general conditions under the Massachusetts Wetlands Protection Act, also apply to this Order under the Fairhaven Wetlands Bylaw.
2. With respect to all conditions, the Conservation Commission designates the Conservation Agent as its agent with full powers to act on its behalf in administering and enforcing this Order.
3. REC-1: A complete set of site plans approved of in the Order of Conditions and the Order of Conditions itself shall be included in all construction contracts and sub-contracts dealing with the work proposed and shall supersede all other contract requirements.
4. ADD-1: The Commission reserves the right to impose additional conditions on any or all portions of this project that could impact an area of statutory interest under the Fairhaven Wetlands Bylaw, subject to Chapter 192-6(D).
5. ADD-2: This Order applies only to the resurfacing of a driveway, with the addition of a circular 16' diameter brick patio/sitting area with associated landscaping. Any future work not approved within this Order subject to jurisdiction under the Wetlands Protection Act will require the filing, at a minimum, of a Request for Determination or Applicability or a new Notice of Intent with the Commission. Prior to the commencement of any such future work, a receipt of a Negative Determination or valid Order of Conditions will be required.
6. ADD-4a: The work shall conform to the following plans and special conditions:
Title: "43 Reservation Rd."
Date: August 29, 2022
Sheets: 1 and 2
7. SIL-9: Haybales shall not be used as sediment control. Biodegradable controls shall be required. Biodegradable controls include silt fence, straw bales, rolled sediment control products (i.e. mulch socks, fiber rolls, wattles, etc.), mulch control netting, erosion control blankets, and turf mats. Photodegradable, UV degradable, or Oxo-(bio)degradable plastics are not considered biodegradable. The previous list of controls are examples only and do not supersede the erosion and sedimentation controls depicted on the approved plan or specified in this Order.
8. SIL-10: Erosion/sedimentation control measures (silt fence, blankets, etc.) shall not contain any nylon netting or nylon mesh backing, which is found to be hazardous to local wildlife.
9. WET-1: The wetland boundary delineated in the field and/or shown on the plans has not been accepted or approved by the Conservation Commission through the issuance of this permit.

B. Prior to Construction

11. Prior to the completion of work, the property owner shall sign and return the Certificate of Understanding.
12. CAP-3: Should other permits be required by the Army Corps of Engineers, Massachusetts Department of Environmental Protection, Planning Board, Zoning Board of Appeals, Board of Public Works, Board of Health, Building Department, and/or any other appropriate local, state, or federal agencies, proof of appropriate permits shall be

submitted to the Conservation Commission prior to the start of the project. Any conditions outlined in those applicable permits shall also apply to this Order.

13. REC-3: Job site posting of a sign clearly visible from the road not less than two square feet or more than three square feet with the words,

Massachusetts Department of Environmental Protection [or MassDEP]

File Number SE 023-1428

Fairhaven Conservation Commission [or FCC]

File Number CON 023-368

This order shall be weatherproofed and affixed to the job site sign. The necessary replacement and maintenance of these postings shall be the sole responsibility of the applicant.

14. PCC-3: The applicant or the applicant's representative shall notify the Commission, in writing, as to the date that the work will continue on the project. Said notification must be received by the Commission no sooner than ten (10) days and no later than five (5) days prior to the commencement of the approved activity.
15. EMC-1: The Applicant shall provide the Commission with the name(s) and telephone numbers of the site contractor and the project manager(s) responsible on site for compliance with this Order. The project manager shall oversee any emergency placement of erosion and sedimentation controls and be responsible for the regular inspection or replacement of control devices and for the proper disposal of waste products. The commission shall be notified in the event that the project manager or site contractor is changed.

C. During Construction

17. REC-2: During the construction phase, the applicant shall be responsible for maintaining a copy of these Orders at the site. The applicant shall be responsible for compliance with the conditions of these Orders.
18. STO-1: At no time shall any construction materials, soils, fills, sediments, dredging or any other substances be stockpiled or stored outside the alteration limit line, or within the area of statutory interest.
19. STO-3: All equipment used on site must be stored or parked in an area outside the 0-25' buffer zone.
20. STO-4: There shall be no discharge or spillage of petroleum product, hazardous material, or any other pollutant into any area of statutory interest.
21. STO-5: There shall be no fueling or maintenance of any vehicles or equipment in any area of statutory interest.
22. MAC-3: All mechanized vehicles under contract, subcontract or lease, participating in any manner, in any phase of activity within resource areas, shall carry on board absorbent materials to immediately respond to inadvertent discharge of petrochemicals.
23. MAC-7: No motorized/construction equipment is to enter or cross a wetland resource area at any time, unless the location of entry or disturbance is clearly indicated on plans and within information contained within the Notice of Intent and approved with the issuance of this Order of Conditions.
24. MAC-8: All equipment shall be inspected regularly for leaks. Any leaking hydraulic lines, cylinders, or any other components shall be fixed immediately.
25. MAC-9: Spill kits shall be maintained on site by any contractor at all times mechanical or motorized vehicles are on site for the immediate response to any potential spill of anything that could cause harm to resource areas and water bodies.

26. DEB-1: The construction site shall be left in a stable condition at the close of each day. Construction refuse and debris shall be removed daily. The Commission may require specific approval for the disposition of such materials prior to the start of construction.
27. DEB-5: Food trash and related waste shall at all times be confined to appropriate containers, which shall enjoy a routine removal schedule. Air and water-borne disposal of non-indigenous materials from this project into resource areas is hereby prohibited.
28. SIL-3: An adequate stockpile of erosion control materials shall be on site at all times for emergency or routine replacement and shall include materials to repair silt fences, hay bales, stone-rip rap filter dikes or any other devices planned for use during construction.
29. SIL-4: All erosion control devices shall be inspected, cleaned, or replaced during construction and shall remain in place until such time as stabilization of all areas that may impact resource areas is permanent. These devices shall be inspected to assure that maximum control has been provided after any rainfall.
30. SIL-8: If soils are to be disturbed for longer than two (2) months, a temporary cover shall be established, following Natural Resources Conservation Service (NRCS) procedures, to prevent erosion and sedimentation.
 - i. If the season is not appropriate for plant growth, exposed surfaces shall be stabilized by straw, jute netting, or other NRCS-approved methods.
 - ii. Any stabilization materials such as jute netting shall be firmly anchored to prevent them from being washed from slopes by rain or flooding.
31. WAS-2: Concrete truck washout shall occur within a designated area appropriately lined and isolated in an appropriate location outside of the resource area.
32. WAT-3: There shall be no direct discharge of dewatering operations into any wetland, watercourse, or drainage system without the approval of the Commission. Any dewatering discharge shall be passed through a sedimentation control device to remove any solids. The contractor is to maintain said sedimentation control devices throughout the entire dewatering operation and repair deficiencies immediately.
33. EC-1: All work shall be conducted in such a manner that minimizes the area of exposed, destabilized soil to the maximum extent possible to prevent runoff and erosion on site.
34. EC-2: All disturbed areas shall be graded, loamed, and seeded prior to November 1 of each year, if possible. No disturbed areas or stockpiled material shall be left unprotected or without erosion controls during the winter.
35. No construction sand or sediment is to be stored in the 0-25' Buffer Zone during construction, and no excess construction sand or sediment is to be disposed of on site.

D. After Construction/In Perpetuity

36. REV-1: All areas disturbed during construction shall be revegetated immediately following completion of work at the site. No areas shall be left unvegetated for more than 30 days. Mulching shall not serve as a substitute for the requirement to revegetate disturbed areas at the conclusion of work.
37. COC-1: The Fairhaven Conservation Commission reserves the right to request an as-built plan as part of the requirements for a Certificate of Compliance.

Perpetual Conditions

The below conditions do not expire upon completion of the project.

38. CHM-2: No liquid or solid chemical lawn fertilizers, pesticides, herbicides or chemical or petroleum dust control agents shall be applied within the area of statutory interest or anywhere that the surface drainage is discharged into an area of statutory interest. This

condition shall survive the expiration of this Order, and shall be included as a continuing condition in perpetuity on the Certificate of Compliance.

39. DER-4: The owner of the property described in this Order must advise any potential buyer of the property that any construction or alteration to said property, including brush cutting or clearance, may require approval by the Fairhaven Conservation Commission. Any instrument conveying any or all of the owners' interest in said property or any portion thereof shall contain language similar to the following:

"This property is subject to the Fairhaven Wetlands Bylaw and/or the Massachusetts Wetlands Protection Act. Any construction or maintenance work performed on this property requires an Order of Conditions and/or a Determination of Applicability from the Fairhaven Conservation Commission."

This condition is ongoing and shall not expire with the issuance of a Certificate of Compliance and shall be recorded in the deed.

E. Signatures

This Order is valid for three years, unless otherwise specified as a special condition pursuant to General Conditions #4, from the date of issuance.

F. Appeals

The applicant, the owner, any person aggrieved by this Order, any owner of land abutting the land subject to this Order, or any ten residents of the city or town in which such land is located, are hereby notified of their right to request the appropriate MassDEP Regional Office to issue a Superseding Order of Conditions. The request must be made by certified mail or hand delivery to the Department, with the appropriate filing fee and a completed Request for Departmental Action Fee Transmittal Form, as provided in 310 CMR 10.03(7) within ten business days from the date of issuance of this Order. A copy of the request shall at the same time be sent by certified mail or hand delivery to the Conservation Commission and to the applicant, if he/she is not the appellant.

Any appellants seeking to appeal the Department's Superseding Order associated with this appeal will be required to demonstrate prior participation in the review of this project. Previous participation in the permit proceeding means the submission of written information to the Conservation Commission prior to the close of the public hearing, requesting a Superseding Order, or providing written information to the Department prior to issuance of a Superseding Order.

The request shall state clearly and concisely the objections to the Order which is being appealed and how the Order does not contribute to the protection of the interests identified in the Massachusetts Wetlands Protection Act (M.G.L. c. 131, § 40), and is inconsistent with the wetlands regulations (310 CMR 10.00). To the extent that the Order is based on a municipal ordinance or bylaw, and not on the Massachusetts Wetlands Protection Act or regulations, the Department has no appellate jurisdiction.

G. Recording Information

Prior to commencement of work, this Order of Conditions must be recorded in the Registry of Deeds or the Land Court for the district in which the land is located, within the chain of title of the affected property. In the case of recorded land, the Final Order shall also be noted in the Registry's Grantor Index under the name of the owner of the land subject to the Order. In the case of registered land, this Order shall also be noted on the Land Court Certificate of Title of the owner of the land subject to the Order of Conditions. The recording information on this page shall be submitted to the Conservation Commission listed below.
