We live at 16 Timothy Street and have been impacted by the industrial sized turbines and sewer plant odors. Our objection to this project is the clearing of the trees that provide some relief from odors, turbine noise and flicker. The impact is worse during the winter months when the trees do not have leaves. With our windows closed and TV playing, we still hear the turbines. We have installed a French drainage system in our basement to resolve the increased water levels we had been experiencing. There is nothing positive that this project will add to our neighborhood; it will only multiply our problems.

Sincerely, Dianne and Richard Clark
