Good Morning Mr. Foley ;

My mother is Ann Parker and owns 9 Paul St. She has no problem if you want to go take pictures to show the trees surrounding her property line. As she can now hear the pump noise, and smell the odor from the sewer plant . Hear the noise of the turbines, and water issues at the lower part of her property at the tree line, she is concerned how bad these problems will be if there is any major tree clearing for the housing project.

We have not spoken at the meeting because the other neighbors have addressed our concerns. But you can count us as being opposed to the housing project because of these quality of life issues. If necessary I will speak for her to be recorded in opposition to the project.
